Опис вакансії

The DataArt team is modernizing the IT structure of one of the world's market leaders in financial analytics. This corporation is ranked as one of the top three largest agencies which specialize in quality management assessment, debt obligations, and paying capacity. The company is based in New York. For over 100 years its most popular product has been its credit ratings. Their publications affect the global economy.

The company's annual revenue is estimated at billions of USDs. Thanks to the system's improvement our client will get the ability to automate the work process of the company's employees and gain new competitive advantages. We developed concepts as well as business software solutions for the corporation using a modern technological stack.

Our team is creating a new multifaceted multi-level service. Using that service, the company's analysts will receive diverse information processing instruments. To guarantee the efficient performance of tasks, we need specialists who are willing to work in our office with open documentation from the world largest financial institutions from several dozen countries.

Requirements:

Excellent knowledge of Java

Experience developing Java Enterprise applications

Experience using Spring Framework

Experience creating REST APIs (Jersey, Jackson)

Understanding of messaging architectures and practical experience using JMS or AMQP systems

Practical experience working with data bases (SQL is a must, SQL + NoSQL is even better)

Knowledge of OOP, OOD and design patterns

Experience using project management tools (Maven, Nexus)

Experience using continuous integration systems (Jenkins, TeamCity)

3+ years of experience developing web applications

Experience of Agile methodologies (SCRUM, TDD)

Self-dependence

Ability to work in a team

Good spoken English.

Additional:

Experience working with Git and Github/Gitlab

Knowledge of JavaScript 2015 (ES6)

Knowledge of JavaScript frameworks (jQuery, React.js)

Knowledge of HTML5/CSS3

Experience working with the frontend tools (SASS/LESS, Bootstrap, NPM, Gulp)

Experience setting up and administering application servers (Tomcat, JBoss).
