Графік роботи:	повний робочий день

## Опис вакансії

### Requirements - Mandatory

Good mathematical background Experience working in deep learning and machine learning fields Understanding processing algorithms of neural networks Experience working with requirements and project documentation Understanding of Agile No formal restrictions on visiting the US up to 3 months Good spoken English

### Requirements - Additional

Knowledge of other programming languages Experience working with cloud technologies Experience of Scrum-based development

### Project Description

DataArt is assembling a team of experts who will engage in creating an analytical platform for one of the world's leading retail companies. The company is currently using several existing products. Our goal is to replace them with a new powerful analytical framework. We will develop it using Agile methodologies based on a modern technological stack. In order to do so, we require specialists with excellent technical and mathematical backgrounds who have knowledge of the most advanced development tools and are ready to learn new technologies (Apache Spark and Storm, GPU, graph, machine learning, and neural networks).
