Опис вакансії

Project description:

The position is a part of a larger Dev-Pro account for a US-based customer providing software for enterprise Quick Service Restaurants (QSR) networks.

The main goal of the project is to provide customers with the ability to integrate an already existing CRM/Loyalty system with the end-clients' ecosystems enabling sales increase through various Loyalty/Gift Card programs.

The position would assume a series of integration projects with several of the more commonly used Point of Sale systems on the US market.

The perfect candidate knows at least a couple languages, is comfortable supporting legacy code one moment and building new features or applications the next.

Role description:

- A person who can prepare technical design and influence the architecture
- Analyze user requirements for system features and functionality
- Conduct direct communication with client and its team, clarify requirements to find an appropriate solution for each system
- Design and write production-ready code to integrate a 3rd party system into multiple POS (Point of Sale) systems
- Work closely with product managers, developers, and quality assurance engineers to maintain existing applications and add new features
- Triage and troubleshoot issues with existing products
- Solicit feedback early and often to make sure we are building the "right stuff"
- Proactively obtain and clarify requirements as necessary

Required skills:

- Good knowledge of C++ (C++11 will be a plus)
- Basic knowledge of COM/OLE
- Basic knowledge of Python 2.7/3.x
- Knowledge of Windows API

Desired skills:

- Solid experience with ATL
- Strong knowledge of Windows software development
- Ability to create multithreaded applications
- wxWidgets experience
- Knowledge of other languages (Python/Javascript) in a plus
