Опис вакансії

Albemarle is a leading specialty chemical company providing innovative chemistry solutions to customers in over 100 countries around the world.

Vacancies currently exist in the Logistic Specialist department.

Responsibilities:

Applies logistics system knowledge as required by the functional role

Resolve operational logistics issues and conflicts and escalate as appropriate

Track and monitor delivery performance (all modes of transport) in meeting customer needs

Develop network of alternatives (routes, service providers, ports) to provide to our businesses and customers as alternatives for deliveries to our customers in respective countries

Own and facilitate the Dow Logistics Material Flow Work Process implementation in the region

Represent Albemarle towards authorities on following topics (Advocacy): Logistics infrastructure, customs, regulations, safety and security

Support administrative activities in Albemarle's ERP systems

Tracking of customer orders and delivery schedules

Coordinate logistics activities between company, customs, transporter, warehouse and terminals

Support supply chain operations initiatives through data analysis and implementation of action plans

Develop and implement the logistics work process and systems for the respective countries in the area

Participates and leads logistics related projects as determined by supply chain leader

Participates in implementation of business or functional initiatives that interface with logistics work processes

Develop and implement Service Provider Management process in respective countries

Ensure regulatory compliance for customs processes

Active research on duty saving opportunities, application for respective licenses and implementation of respective customs tools and processes.

At Albemarle, we are harnessing the power of science and technology to improve the lives of people around the world.

To recognize their outstanding efforts and contributions, we offer a total rewards package which is considered top tier in our industry.
